**17. ABOUT THE ARTICLE REVIEW**

The scientific articles are analyzed by the CONSINTER Editorial Board, formed only by renowned Doctors and Post-Doctors, jurists, Brazilian and foreigners, especially invited. The scientific articles will be evaluated by the double-blind review system, in which two CONSINTER members of the board will evaluate the works without any authorship identification. The assessment of scientific articles by anonymous authors guarantees impartiality of judgment and decreases subjectivity and ideological preferences. This way, authors must avoid direct references to themselves and citations that make it possible to extract its authorship from the reading of the text.

If the scientific article is accepted by one of the CONSINTER members and failed by another, the text, at the suggestion by the Director Council, can be subjected to the assessment by a third party.

- a) The content of the scientific articles is the authors' full responsibility, and after subjected to assessment cannot go through any changes or replacements, except if requested by the Editorial Board;
- b) Plagiarism or the insertion of literal copies are not allowed.

**18. EVALUATION CRITERIA**

- l) Theoretical background;
- m) Results/ Discussion;
